AAL Challenge Prize

Challenge Statement

- AAL is seeking innovations in internet connected devices and technologies (**Internet of Things**) that will empower older adults to achieve the quality of life they aspire to, socially and independently.
- The innovation should present a business opportunity which improves connectivity between older adults, devices and technologies related to any aspect of their life (e.g., home, social, work, study, transport or services).
- Innovations must involve older adults in the development and testing of the technology

Timeline

50,000 Euro as award (only one winning proposal)

Q&A webinar on 16th March 2016
